

Skilling our cyber security workforce

TAFecyber focuses on the education
and training of skills for the increasingly
in-demand cyber security workforce.

TAFEcyber is a consortium comprised of TAFE colleges across Australia, providing students with the essential knowledge and technical skills to gain a sustainable and thriving career in Cyber Security.

TAFEcyber is backed by key government and industry partners including AustCyber, Ionize and Fifth Domain.

Our TAFE partners offer cyber security training ranging from Skillsets to the Advanced Diploma of Cyber Security. With a rich repository of course materials quality assured by our industry partners, our students will use their skills to participate in national cyber security events.
