CONTACT US

The CSER Group at the University of Adelaide is home to the National CSER Digital Technologies Education Program in the School of Computer Science.

Teacher Professional Development

We offer a range of free professional learning for teachers across Australia via three key initiatives – MOOCs – Massive Open Online Courses; Face to Face workshops with experienced educators; a lending library of Digital and Emerging Technologies resources. We have an active research program and use an evidence-based approach to our work. We also encourage our teacher community to share and learn from each other with our online communities linked to each of the MOOCs.

All CSER MOOCs are aligned to the Australian Curriculum: Digital Technologies. We currently offer the following courses:

- Foundations – 6 Digital Technologies
- Foundations – 6 Extended
- Years 7 -8: Next Steps
- Years 9-10: Explore
- Teaching AI in the Primary Classroom
- Teaching AI in the Secondary Classroom
- NEW!! Cyber Security & Awareness – Primary Years
- NEW!! Cyber Security & Awareness Secondary Years

Workshop

Our team of Project Officers deliver online and face to face professional learning workshops for teachers across Australia. Linking the workshops to the MOOCs and the Lending Library, we aim to support educators with whole school implementation of the Digital Technologies Curriculum including the emerging areas of Artificial Intelligence and Cyber Security.

National Lending Library

To support schools access the latest digital technologies resources, CSER with the support of the Australian Government Department of Education, Skills and Employment offers a National Lending Library. Schools across the country can apply to borrow a range of equipment from foundational tools such as Beebots, Ozobots and Makey Makeys to emerging technologies such as Virtual Reality Headsets and Augmented Reality experiences.

FOR FURTHER ENQUIRIES

We have been fortunate to work with almost 40,000 teachers across the country but there are still many more to reach. If you can support our endeavours we would love to hear from you. We partner with a range of industry and government organisations.

If you are a teacher and would like to participate in our program please follow any of the links in this document or via details below.
