About the Australian Computing Academy (ACA)

If video doesn't play please click [here](#)

The University of Sydney leads the Australian Computing Academy to provide the intellectual, technical, and practical leadership needed to fulfil the ambitious goals of the Australian Curriculum: Digital Technologies.

The ACA collaborates regularly with education, industry and the broader tech community to champion a deeper understanding of Digital Technologies and their applications in a range of fields, including computer science, data science and cyber security.

About the Australian Computer Society (ACS)

About ACS

ACS is the professional association for Australia's technology sector. More than 50,000 ACS members work in business, education, government and the community. ACS exists to create the environment and provide the opportunities for members and partners to succeed.

ACS strives for technology professionals to be recognised as drivers of innovation in our society, relevant across all sectors, and to promote the formulation of effective policies on technology and related matters. Visit www.acs.org.au for more information.

About The ICT Gateway to Industry Schools program

ACS' ICT Gateway to Industry Schools program (GISP) seeks to assist secondary school students and their parents with subject selection, work placement and vocational training opportunities, to connect with industry and to consider and develop a pathway into a rewarding ICT career.

The project also intends to provide secondary educators with opportunities to participate in professional development activities, to connect them with industry and the types of opportunities afforded through a growing sector, and to connect them with other ICT educators across the nation to collaborate, to access teaching resources and to share ideas

This Gateway to Industry Schools program is proudly supported and funded by the Queensland Government.
