# ENTERPRISE SOLUTIONS

We employ multiple tests of user identity to achieve 99.999% accuracy for user onboarding

We create a reusable 'singleton' for each user based on identity documents and biometrics

We use AI/ML to verify authenticity of user identity documents to mitigate fraud risk

We replace insecure passwords with any combination of user biometrics

We perform multiple tests of user liveness to mitigate risk from deep fakes

We enable enterprises to incorporate facial recognition into existing authentication solutions
